**Dear Hiring Manager,**

I am writing to express my interest in joining Optum, a global leader in health services and technology. As a 2025 Computer Science Engineering graduate with one year of hands-on internship experience, I am eager to contribute to Optum's mission of helping people live healthier lives through technology-enabled solutions that enhance care, connectivity, and health outcomes.

During my internship at Ford Motor Company, I worked extensively with SAP ABAP and ABAP OOP, developing RICEF objects and implementing data conversion techniques such as BDC, LSMW, LTMC, and BAPI. These efforts improved data migration efficiency by 20% and ensured complete data accuracy, reflecting my commitment to precision and process excellence—values that strongly align with Optum's operational standards. Collaborating with cross-functional teams in a dynamic environment honed my ability to adapt, communicate effectively, and deliver high-quality results under compliance-driven workflows.

In addition to my SAP expertise, I am a **KNIME Level 3 Certified Developer** with strong proficiency in **Python and SQL**. I have applied these tools to automate workflows, validate datasets, and optimize reporting processes. My background in **artificial intelligence and machine learning**—including projects involving CNNs, RNNs, and Seq2Seq models—has strengthened my data-driven problem-solving mindset and ability to design scalable, impactful solutions.

**Key strengths I bring include:**
- Data handling, transformation, and automation using KNIME and SQL
- Experience in AI/ML model development (CNN, RNN, Seq2Seq) using TensorFlow and Keras
- Proven analytical and problem-solving capabilities
- Proficiency in Python, Excel, and business process tools
- Strong communication and collaboration skills

I am deeply inspired by Optum's culture of inclusion, innovation, and global impact. The opportunity to apply my technical and analytical skills toward improving healthcare access, efficiency, and outcomes excites me. I am confident that my background in technology-driven solutions aligns with Optum's goal of advancing health optimization on a global scale.

Thank you for considering my application. I would welcome the opportunity to discuss how I can contribute to Optum's mission and your team's success.

Warm regards,
**A H Brijesh**
